

Description

**Wood Bracket 10T11** is handcrafted of solid Western Red Cedar Timbers. Cedar timbers have unique natural colors, grains, tight knots and textures. All of our brackets are built to last, joined with screws or bolts depending on the size of the bracket, we also use a special exterior grade glue at each connection. The bracket is finished with the option you selected and ready for your paint or stain depending on your project requirements. For additional strength you can order our structural bracket, please call our customer support for pricing and ordering information. **Custom Order Available: Size, Wood Species, and/or Design**
